Subject: CDPHE, Radian & RMRS OPACITY OBSERVATIONS

Ted:

The following buildings had tests performed during the month of September for the permitted diesel fuel-fired emergency generators and pumps under RMRS' control:

Building 881G (two generators): NO FINDINGS OR OBSERVATIONS

Building 989: NO FINDINGS OR OBSERVATIONS

Building 827: NO FINDINGS OR OBSERVATIONS

Building 427: NO FINDINGS OR OBSERVATIONS

Building 985 & 991: Air Quality Management has discontinued using the existing multi-point effluent air samplers in these buildings, since no materials are being handled or processed with the potential to release radioactive particles or gases to the atmosphere. The room air from the vaults and storage rooms are vented to plenum systems 985 and 991. From time to time all release points in Building 991 may require to be reevaluated periodically to determine any changes in source activities for monitoring status. NO FINDINGS OR OBSERVATIONS

Building 566: NO FINDINGS OR OBSERVATIONS

If you need any more information, please let me know.

Thanks,
Veronica
